Governor, Dwight Green

Sir.

Your statement in the Tribune that the seven loan drives were for our protection and this one is for the soldiers, is far from the truth.

All of this money is for the benefit of the British Empire and the big shots who put the welfare of England before that of the U.S.

It seems the Democrats and the Republicans are equally willing and anxious to sell out the U.S. to England, and while it is true that the Raw Deal Democrats were most guilty in the sell out of Uncle Sap, they at least have always seemed to give a workman a few breaks

I'm plenty mad – our crooked worth-less foreign minded politicians have taken enough from me in taxes to support Roosevelts war, to have enabled me to buy a small home of my own, besides this gang has reduced my life insurance value 35%

If the Republican party expects to make a decent showing at the polls, they had better decide to serve the U.S. for a change, and let England look after her self for a change while. The workmen of this country are comming to their senses.

Very truly yours

Chas. Todd.
